COLORADO POTATO BEETLE - DIGEST OF STATE QUARANTINES

In effect December 15, 1937, according to files of Bureau of Entomology and Plant Quarantine.

Comparison of the following quarantines of these 7 States shows that 3 States restrict potato tubers only and that the remaining 4 all vary as to articles restricted; that the 7 States have 7 different areas; and that there are 7 different conditions of shipment.

Restricted Articles	LIBRARY RECEIVED ★ FEB 16 1938 ★ U. S. Department of Agriculture		Quarantined Territory	Conditions Governing Shipment
Potato tubers			All States	Must be certified as grown and shipped from a beetle-free locality; or if not from a beetle-free locality, the certificate to show the potatoes were screened over 1 in. mesh immediately before loading and shipped in clean sacks and clean car. Certificate to accompany shipment.
States having quarantines	Exceptions to above restricted articles	Exceptions to above quarantined territory	Exceptions to conditions governing shipment as stated above	
CALIFORNIA	Plants of potatoes, of eggplants and of tomatoes also restricted.	Nevada and Territory of Hawaii excepted.	Certification as to beetle-free locality required of plants. Potatoes accepted if so certified or if screened as above (whether from a beetle-free locality or not) and kept free from soil chunks and cuttings.	
COLORADO	Potatoes not restricted. Quarantine applies to plants of tomato and pepper only.	California and Nevada excepted. Quarantine applies to entry into only 25 Colorado counties.	The county of origin must be certified as free from the beetle. One copy of certificate to be mailed to the Colorado official.	
IDAHO	No exceptions.	Quarantine applies only to Montana, Oregon and Washington, or any State or Territory in which infestation is to be found. (Quarantine applies to entry into 30 Idaho counties only.)	Screen must be "officially approved".	
NEVADA	No exceptions.	No exceptions.	The county of origin must be certified as beetle-free; screening to be done with an approved mechanical grader or screen under inspector supervision. Common carriers required to clean cars. Duplicate certificate to be mailed to Nevada officer.	
OREGON	Potato tops must not be shipped. No other exceptions.	California and Nevada excepted.	No specifications as to screen.	
TEXAS	No exceptions.	(Quarantine applies to entry into 3 Texas counties only). No other exceptions.	No provision for certification based on inspection. All potatoes to be screened.	
UTAH	Potato tops and tomato plants prohibited. No other exceptions.	California, Nevada, and parts of Arizona and Idaho excepted.	Requirements apply only from April 1 to September 30. No provision for certification based on inspection. All potatoes must be screened.	

## RASPBERRY DISEASES

DIGEST OF STATE QUARANTINES IN EFFECT DECEMBER 15, 1937  
 ACCORDING TO FILES OF BUREAU OF ENTOMOLOGY AND PLANT QUARANTINE

The headings as to restricted plants, diseases, and conditions governing shipment represent the plants, diseases, and conditions as stated in a majority of the quarantines.

	<u>Pests under Quarantine</u> Virus diseases of raspberry	<u>Raspberry plants</u>	<u>Conditions governing shipment</u> Certified as field inspected twice in season at 30-day intervals and found apparently free from diseases.
States having quarantines or inspection requirements	Exceptions to diseases	Exceptions to restricted plants	Exceptions to Conditions
KANSAS (No number)	No exceptions.	No exceptions.	Tolerates 2% mosaic first inspection; 1% second inspection.
MICHIGAN Quarantines 272 and 273 1/27/28	No exceptions.	Plants (roots or tips).	Black varieties--Tolerates 8% first inspection; 2% second inspection. Red varieties--Tolerates 5% first inspection; 2% second inspection. Each block considered separate in certification. Two roguing required.
MINNESOTA Quarantine 6, 1/16/28 and Regulation 1, 3/13/28	Mild mosaic of black and purple varieties excepted.	No exceptions.	Tolerates 8% first inspection; ~2% second inspection. Roguing required. No infected planting to occur within 15 rods of certified plants except that orange rust and streak within 15 rods do not disqualify red raspberries.
NEW JERSEY Regulations 1 and 2, 3/24/36	No exceptions.	Plants (roots or tips).	No 30-day interval provision.
NEW YORK Quarantine 23 3/6/25	Mild mosaic on purple varieties excepted.	No exceptions.	Permit required. Roguing required.
NORTH DAKOTA General requirement.	No exceptions.	No exceptions.	Inspection requirements not stated. To be certified as free from disease.
OHIO General requirement.	No exceptions.	No exceptions.	No exceptions.
OREGON No. 28 2/5/37	No exceptions.	Also loganberry, dewberry, blackberry and horticultural varieties.	Certification that plants are from fields free from virus required in shipping to 17 designated Oregon counties. May enter other counties only in case of desirable varieties under permit and safeguards.
VERMONT General requirement.	No exceptions.	No exceptions.	No 30-day interval specified.
WASHINGTON Quarantine 21, 12/3/34	Quarantine applies only to mosaic. (Has a separate quarantine on cane gall.)	Also blackberry.	No 30-day interval specified.
WISCONSIN Quarantine 7, 1/1/30	Mild mosaic of black and purple plants excepted.	No exceptions.	Tolerates 8% first inspection; ~2% second inspection. Roguing required. No infected planting to occur within 15 rods of certified plants except that orange rust and streak do not disqualify red raspberries.

CITRUS CANKER

Digest of State quarantines in effect December 15, 1937, according to files of the Bureau of Entomology and Plant Quarantine

Plants and Plant Products Restricted

Citrus trees, scions, buds, and seeds.

STATES HAVING QUARANTINES	EXCEPTIONS TO ABOVE RESTRICTED PRODUCTS	STATES QUARANTINED AGAINST	NATURE OF RESTRICTIONS	OTHER CITRUS PESTS UNDER RESTRICTION	
				IN CANKER QUARANTINE	IN SEPARATE QUARANTINE
ALABAMA Rules 10, 11, 15, 17, 19 2/1/32	"Other host plants" restricted.	a-Florida, Louisiana b-Other States and foreign countries	a-Prohibited b-Permit	Purple scale Camphor scale Scaly-bark and "other seriously injurious pests"	
CALIFORNIA Quarantine 1. 3/9/27	a-Quarantine includes cuttings and fruit  b-Automobiles, vehicles, baggage, emigrant movables, personal, household, and camping effects.	a-All States except Arizona  b-Any part of U. S.	a-Nursery stock prohibited. Seeds and fruit may enter under permit.  b-Placed in quarantine until inspected.	Scale insects, fruit flies, scab.	Quarantine 10--Whiteflies. Citrus plants and 18 other host plants prohibited entry from 10 States.
FLORIDA No. 28 11/26/34	Quarantine includes citrus trees and parts "and all other host plants"	All States	Prohibited except new or rare varieties may enter under Permit.		Rule 30--Brown rot of lemons and oranges. Certification required. Relates to shipments from California.
LOUISIANA Rules 2, 3, 16  1/1/16	a-Quarantine includes leaves.  b-Nursery stock other than citrus	a-All States  b-From nurseries infected with canker.	a-Prohibited except in special cases b-Prohibited	Other dangerous pests.	Seven additional rules relate to camphor scale.
MISSISSIPPI No. 43 4/1/25	Twigs and blossoms included in restrictions.	a-Louisiana Texas  b-Other States	a-Prohibited except that seed may enter from Texas under permit.  b-Permit required for citrus nursery stock.		
TEXAS Proc. 34, amended by several subsequent proclamations.	Citrus fruits also restricted.	a-Florida, Louisiana.  b-All States	a-Permit required for fruits and nursery stock.  b-Certification and treatment of seeds required.		Proc. 37--Melanose of citrus. Fruits and nursery stock not permitted entry from Alabama, Florida, Louisiana, or Mississippi except under permit.

GENERAL CITRUS QUARANTINES OR REGULATIONS  
WHICH DO NOT SPECIFY ANY PEST

ARIZONA Quarantine No. 5, dated 7/9/36 prohibits entry of citrus fruits from all States except California. Permit is required for entry of nursery stock from all States. Cape jasmine, privets, and rubber plants prohibited from 10 southern States and 3 California counties.

SOUTH CAROLINA Regulation N-5-B relates to "citrus" without explanation of term and requires permit for entry.

Digest of State quarantines on file in Bureau of Entomology and Plant Quarantine - December 15, 1937.

A comparison of these quarantines in an effort to find similarities shows that the 9 States have 3 different types of restricted products, 8 infested areas, 7 different conditions governing certification, and 5 types of other details such as marking and manner of handling certificates.

Restricted Products	Infested Area	Conditions Governing Certification	Other Details
Potatoes	California Florida Tennessee Hawaii Louisiana Utah North Carolina	South Carolina Tennessee Texas Utah Virginia	One copy of certificate giving other details to accompany B/L, one to be sent to destination State.
States having quarantines	Exceptions to above restricted products	Exceptions to above infested area	Exceptions to other details
ALABAMA No. 30 5/6/36	Only seed potatoes restricted	Only Florida is under quarantine	Tag to accompany shipment
IDAHO No. 11 8/4/27	No exceptions	(a) Special restrictions apply only to Calif., Fla., Tex., Va. (b) All other States.	No other details
MONTANA No. 9-B 9/21/36	No exceptions	Ia., N.C., S.C., Tenn. not under quarantine	Further tagging required for broken lots
OKLAHOMA Quar. tags. 12/15/37 various potato pests	Only seed potatoes restricted	Regulations apply to any source	No other details.
OREGON No. 19 2/5/37	No exceptions	Utah not under quarantine	One certificate to accompany shipment; one to be sent to State.
TENNESSEE No. 7 5/15/35	No exceptions	Iowa and Maryland also listed as infested. T.H. not included.	No other details required.
TEXAS No. 40 3/10/31 Tuber moth and eelworm	No exceptions	T.H. and Utah not listed in infested area. Restrictions relate only to entry into 3 Texas counties.	Certificate need not be sent State office.
UTAH 1-A 8/5/33 Tuber moth and eelworm	Includes tomato plants	T.H., Ia., N.C., S.C., Tenn., Utah not under quarantine.	No exceptions
WASHINGTON No. 20 1/22/37	No exceptions	Ia., N.C., S.C., Tenn. not under quarantine.	Further tagging required as to broken lots.

TOMATO PINWORM -- DIGEST OF STATE QUARANTINES

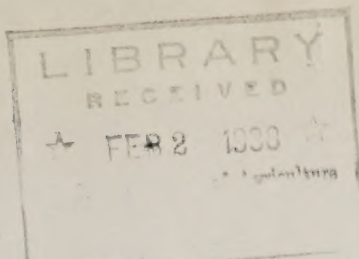

In effect December 6, 1937, according to files of Bureau of Entomology and Plant Quarantine.  
The following headings, "Infested Area", "Conditions Governing Movement", etc., represent the area, the conditions, etc., as stated in the majority of the quarantines.

<u>Plants and Plant Products</u> <u>Restricted</u>	<u>Infested "Area"</u>	<u>Conditions Governing</u> <u>Movement</u>	<u>Conditions Governing Certification</u>
Tomatoes and tomato plants and parts thereof. Quarantines are uniform as to restricted articles. (Washington State amended the quarantine on 4/8/37 to remove Texas from the infested area and advised that "tomatoes will be accepted from that State without the requirements provided for in the quarantine", but failed to state that the plants would also be so accepted.)	California Delaware Florida Hawaii Mississippi Missouri New Mexico Pennsylvania Virginia Republic of Mexico	Certificate of the State, Territory, or country of origin required, based on (1) freedom of area of origin from pinworm, or (2) fumigation.	The shipment must be from an area known to be free from the pest or the products must have been fumigated in a mercurial vacuum of not less than 20 inches with one of the three following dosage schedules: (1) Not less than 2½ pounds methyl bromide per 1000 cubic feet for 90 minutes; (2) Not less than 35 pounds methyl bromide and carbon dioxide in combination per 1000 cubic feet for 90 minutes, provided that not less than 7% of the fumigant shall be methyl bromide; or (3) Not less than 28 pounds carbon bisulphide and carbon dioxide in combination per 1000 cubic feet for 75 minutes.
<u>States</u> <u>Having Quarantines</u>	<u>Exceptions to</u> <u>Above Infested</u> <u>Area</u>	<u>Exceptions to Above</u> <u>Conditions Governing</u> <u>Movement</u>	<u>Exceptions to Above Conditions</u> <u>Governing Certification</u>
COLORADO Order 3 effective 4/15/37	None	Restrictions apply only from April 15 to November 1.	Certificates to be based on knowledge that the shipment is apparently free from viable forms of tomato pinworm as determined by one of the following methods: (a) Certification that the county of origin of the regulated products has not been and is not infested with the pinworm; (b) Inspection within two weeks prior to shipment of all tomato plantings within a 2-mile radius of the growing point; or (c) Fumigation by schedule (1) or (2) as stated in the heading. No provision for schedule (3).
IDAHO Order 20 issued 6/17/37	Arizona, Texas and Utah included in infested area.	No provision for certificates based on inspection.	No provision for certificates based on inspection. Fumigation by one of the three above methods required.
MONTANA Order 10-C issued 2/8/37	Texas included in infested area. Delaware excluded.	No exceptions.	No exceptions.
OREGON Order 23 issued 2/5/37. Amended 4/19/37.	No exceptions.	No exceptions.	No exceptions.
UTAH Order 8(a) as amended 6/27/35. (Text of quarantine not at hand. Information obtained from a California circular.)	Florida, Hawaii, Mississippi, New Mexico, and Virginia not included in infested area. The Utah quarantine applies to the "West Coast of Mexico".	Fumigation not required.	The certificate to state that the plants or fruits were grown in a district free from the pinworm or that they are free from the pest at the time of shipment and that the tomato plants are free from <u>quack grass, wild morning glory, white top, Russian knapweed, puncture vine, and perennial sow thistle.</u> Fumigation not required.
WASHINGTON Order 24 effective 2/8/37. Amended effective 4/8/37.	No exceptions.	No exceptions.	No exceptions.

Not intended as a guide for shippers.

VETCH WEEVIL

Digest of State Quarantines  
in Effect December 15, 1937. According to Files of  
Bureau of Entomology and Plant Quarantine.

The following headings--"Infested Area," "Conditions Governing Movement," etc., represent the area, the conditions, etc., in the majority of the quarantines.

Restricted Products	Infested "Area"	Conditions Governing Movement
Vetch seed.	Delaware North Carolina Georgia Pennsylvania Maryland South Carolina New Jersey Virginia	Fumigation with 12 oz. sodium cyanide per 100 cubic feet of air-tight space for 4 hours at a temperature of 60° F.
States having Quarantines	Exceptions to Infested Area	Exceptions to Conditions
Arkansas	No area stated. Rule applies to any vetch seed shipped into the State.	Shipment must be labeled as to the seedsman who holds an Arkansas permit. Truck drivers must carry copy of permit. The applicant should send the Arkansas Plant Board a certificate showing each lot of seed shipped into the State is free from the weevil or has been fumigated (schedule not prescribed). Annual fee of \$5.00 required. Certificate required semi-monthly.
California	None	Requires fumigation for 24 hours at schedule stated in heading.
Oklahoma	Includes District of Columbia and Rhode Island.  All States other than those in the infested area  States east of Mississippi River (other than the infested area)	Embargo on seed from infested area.  Must be accompanied by a certificate showing the seed was grown in the State from which the shipment originates and that the weevil is not known to exist in such State.  Permitted entry only from January 1 to April 15 following year of production, and then under certificate as above.
Oregon	Does not include Georgia or South Carolina. Includes foreign countries.	None.
Washington	Does not include Georgia or South Carolina.	None. All vetch seed whether from infested or noninfested area must be held by carrier for inspection.
